

SNOWBOARDS

Your mailbox is on the road right-of-way. This is permitted by the Road Commission as a convenience to you. If snow plowing damages or knocks your mailbox down, please understand, it can happen. As these photos illustrate, the view from the driver's seat of the grader or plow truck is a cloud of white.

Mailbox 'snowboards' are becoming increasingly popular in areas which receive heavy snowfall. The idea is that the snowboard will take the impact of the weight of the snow and ice instead of the mailbox and post. Below is an example of the proper installation of a snowboard.
